

UCB, Inc.
Physician Payment Report
January 1, 2015 - December 31, 2015

This report provides aggregate information related to payments and other transfers of value consistent with the categories defined in the Affordable Care Act, and reported under the Open Payments Program. Only payments and transfers of value made to Physician Covered Recipients ("Physicians") are included in this aggregate information. This report includes payments made both directly to Physicians as well as payments made to a third party on behalf of the Physician (for example, clinical trial payments). To promote additional transparency, UCB has distinguished two categories of payments: General and Research.

General payments and transfers of value include consulting fees, speaker fees, travel costs, lodging costs, modest meals, and educational items.

Research payments and transfers of value include payments made in connection with clinical research and related activities. For research payments, the Physician listed is the principal investigator for the research activity. Research payments have been attributed to this individual but may have been paid, in whole or in part, to a third party affiliated institution or entity.

To obtain more detailed information on this data, UCB encourages you to visit the Centers for Medicare and Medicaid Services Open Payments website where the specific transactional data for 2015 will be made publically available for all applicable manufacturers (approximately June 2016). <http://www.cms.gov/openpayments/>

Due to the on-going nature of payment reporting, the information contained in this report may be revised periodically. For questions or concerns, please contact transparency@ucb.com.
